

## ACT D'MAND KONTROLS® Systems

### Wireless Transmitter Button (WT)

With the WT Wireless Transmitter, the user interfaces with the D'MAND Kontrols® System by simply pushing the button, before using hot water. The remote battery operated transmitter sends a signal back to the receiver, which is directly wired to the pump. The pump sends ambient water in the pipes, via the cold water line, back to the water heater (either tank or tankless) while rapidly pulling the hot water from the water heater to the furthest fixture.

The WT is a battery operated (model#A23/12v) wireless transmitter which works with the WRT-KIT wireless receiver transmitter kit This is compatible with any ACT D'MAND Kontrols® wireless transmitter kit from 1994 to present. (RT-954/ RT-911) There is no limit on the number of WT transmitters you can use with a wireless receiver.

The WT WILL NOT OPERATE in conjunction with Models:  
WMSCB-KIT, WMSCB, WMSRB-KIT, WMSRB, HWMSRB
